

Etron Announces August 2008 Sales Report

Etron Technology (GTSM: 5351) today announced that its net sales for August 2008 were NT\$656 million (US\$21 million), up 2.3% from NT\$641 million (US\$21 million) for July 2008. Accumulated revenues from January through August of this year totaled NT\$5,618 million (US\$182 million).

Despite global economic slowdown and fierce price competition of the DRAM industry, the company managed to grow both of its August revenues and shipment volumes from the previous month. The company has maintained strong relationships with customers, and will continue to make its best efforts to further migrate toward advanced technology for lower costs, and provide the most optimized products and services to customers.
