

Etron Reports First Quarter 2013 Results

Etron Technology, Inc. (GTSM: 5351) today announced results for the first quarter of its fiscal year 2013, which ended on March 31st, 2013.

Etron's quarterly consolidated revenue for the first quarter totaled NT\$ 1,520 million, up 7.1% from NT\$1,420 million for the same period of the prior year. Consolidated net losses after tax for the first quarter was NT\$128 million. Consolidated Loss per share was NT\$ 0.27.

Revenue for the first quarter of 2013 slightly decreased QoQ due to the traditional seasonality. Etron remains cautiously optimistic outlook towards second-quarter and third-quarter. The demand and price for DRAM memory has increased significantly from March, 2013. Hence, being at the cutting edge of design for the KGD memory, Etron's KGD memories are widely used by the system customers in computer, consumer, communication, and car electronics fields. Etron keeps to pursue business growth and be profitable in the future by means of timely adjusting the marketing strategies, cultivating existing clients and developing new clients, and strengthening product portfolio for diversified applications.

In addition to the memory IC, Etron's advanced system-on-chip (SOC) logic IC includes USB3.0 host controller, USB 3.0 flash drive controller, and 3D motion-recognition and gesture-control sensing controller, which were displayed and demonstrated at the Intel Developer Forum (IDF), Beijing. It is believe that Etron's R&D Innovation and R&D garnered most of the attention. Moving forward, the company keeps to further increase the SOC logic IC's volume production, to further improve its revenue contribution.
